Matthew Diaz
Dave Small
HW 6
Cop 4930

On my honor, I have neither given nor received unauthorized aid in doing this assignment.

Matthew Diaz

Learning Experience:

I felt like HW6 was a great homework assignment since it forced me to get my multi-threading skills up to a high level where I could do basic and semi advanced tasks with threads. I am glad that we spent so much time in threading this semester since it is an impressive skill that I have added to my coding skills and I now will make me a better coder. I learned how to make sure that no memory leaks happen with the the orientation changes. HW6 also helped me on using an SQLite database in Android apps.
